This is the first of four more attachment emails re the DOGGR submittal. All four relate to the Olcese formation.

A file I looked at last night appears to be an example of an exemption by default under 40 CFR 144.7, in which DOGGR made a request for an aquifer in the 3-10K TDS range, it looks like EPA did not affirmatively act, so DOGGR sent a letter stating that they deem the formation to be exempt.

Sorry this has turned into a mess. I'll send a clarifying email once these are all to you.
